

A GUIDE TO LONGTHORNE BARRELS

Four distinctive options. One uncompromising approach to precision engineering.

CHARACTERISTIC	STANDARD STEEL	PEREGRINE	STAINLESS STEEL	TITANIUM
Construction	Monolithic	Monolithic	Monolithic	Monolithic
Material	Steel	Steel	Stainless steel	Titanium
Weight profile	Traditional	Breech-biased distribution	Steel-type weight*	Significantly lighter*
Handling character	Smooth, controlled	Lively, responsive	Smooth, controlled*	Light, agile
Corrosion resistance	Protective finish	Protective finish	Enhanced resistance	Excellent resistance
Blackened finish	Available	Available	Available on request	Available on request
High Performance Steel Shot proof	Standard**	Standard**	Standard**	Standard**
Principal advantage	Versatility and value	Optimised balance	Corrosion resistance	Reduced weight

HIGH PERFORMANCE STEEL SHOT PROOF — A LONGTHORNE STANDARD

All Longthorne barrels are proofed for High Performance Steel Shot as standard, unless otherwise specified by the customer.

** Weight and handling vary by gauge, length and configuration. ** Check individual gun proof marks and ammunition suitability.*
